PROFESSIONAL SUMMARY

Frontend Engineer with 3.3 years of experience specializing in React.js development. Skilled in crafting intuitive and responsive interfaces, with demonstrated success in delivering high-quality solutions for clients in the banking and energy sectors. Experienced in enterprise software solutions for business transformation, focusing on complex program management and exhibiting a strong grasp of frontend web development principles.

EDUCATION

A.P. Shah Institute of Technology, University of Mumbai

Jun 2017-Jun 2021

Degree: Computer Engineering GPA:7.75/10

WORK EXPERIENCE - 3.3 Years

Accenture, Mumbai

Sept 2022 – Oct 2024

Software Engineer (SE)

- Proficient React.js developer with a proven track record of creating responsive and user-friendly applications.
- Contributed to delivering enterprise software solutions for business transformation to prominent clients, gained valuable experience with an Australian bank and a multinational oil and gas company.
- Utilized micro-frontend architecture with React.js, incorporating React hooks and functional components, to create modular and independent frontend components.
- Led the implementation of new features and enhancements in React applications, following agile methodologies to deliver incremental value to stakeholders.
- Integrated Java-based REST APIs seamlessly into the application's architecture, leveraging React for efficient data handling and manipulation.
- Developed a custom component within a third-party library and Navigation Prompt functionality to meet project-specific requirements.
- Implemented efficient unit and integration tests using Jest to ensure code reliability and maintainability.
- Successfully addressed high-priority bugs within tight deadlines and under challenging pressure situations.

Skills: React.js, JavaScript, HTML, CSS, Material UI, Jest, Enzyme, TypeScript

Associate Software Engineer (ASE)

Jun 2021 – Aug 2022

- Developed and maintained React.js applications for an Australian bank in the Business banking domain. Worked on the main Business Transaction Account (BTA) application as well as associated mini React apps.
- Integrated GraphQL APIs for fetching data and performed query and mutation operations.
- Designed and developed SAPUI5 applications based on the MVC architecture, leveraging key components such as custom views, controllers, JSON Model, ODATA model, and navigation concepts.
- Collaborated seamlessly with fellow developers, product owners, and designers to comprehend project requirements.

Skills: React.js, SAPUI5, Fiori, JavaScript, HTML, CSS, OData, Redux, GraphQL

TECHNICAL SKILLS

| | |
|---------------------|--|
| Web Technologies: | JavaScript, HTML, CSS, Material-UI |
| Framework/Library: | React, SAPUI5 |
| Other Technologies: | TypeScript, ES6, Redux, GraphQL, Jest, Enzyme, OData |
| Other Tools: | Git, Azure DevOps, VS Code, SAP Web IDE, Figma |
